Programs entering Phase 1 in 2008–2016, approval within 10 years
How well approval is predicted
What each line contributes
Targets held out
Area, modality, novelty, year
... plus the evidence lines
Evidence lines only
Later programs held out (2013–2016)
Area, modality, novelty, year
... plus the evidence lines
Evidence lines only
Rare inherited variants, including single-gene disease
Any human genetics
Gene recurrently mutated in this cancer
Mouse genetics: knocked-out or mutant mice show the disease
People rarely carry broken copies of the gene
The gene's RNA level differs in diseased tissue
