Randomised industry Phase 2/3 efficacy trials started 2008–2019, by primary endpoint
Trials with genetics / all trials
Target engagement
21 / 62
Exploratory biomarker
24 / 262
Regulatory surrogate (LDL-C, HbA1c, viral load…)
212 / 1,372
Objective physiology (6MWD, visual acuity, weight…)
81 / 452
Clinician-rated scale or responder index
170 / 1,314
Disease events (relapses, exacerbations…)
51 / 341
Hard outcome (death, MI, stroke…)
11 / 162
Tumour response
34 / 157
Progression-free survival
104 / 536
Overall survival
26 / 245
